

Tree Removal Process

If you believe your tree is dying, please call or email the greenspace administrator (bpatz@wl.in.gov or 775-5170). Your tree will then be inspected to determine if it is hazardous. If it is, it will be turned in to the street department for removal. From there, the street department schedules its removal based on priority. If you have questions about when it will be removed, please call the street department at 775-5242. If the tree is not deemed hazardous it will not be removed. Stumps are only ground if the city budget allows it. Thank you for helping us care for our urban forest.
